

Downtown Waterfront Development Concept Plan

The Concept Plan is meant to guide future development of the property in accordance with the Village's existing and desired community character. The plan illustrates a vision for this site based on community input and outlines the Village's options for moving forward to facilitate the realization of this vision.

PROJECT OBJECTIVES:

- Create a destination to attract visitors and economic activity to the Village year round.
- Ensure that development at the site is well-connected to the heart of the Village allowing residents and visitors to move easily between the waterfront and downtown.
- Provide a variety of waterfront and water-based uses – for recreational boaters, tour boats, non-motorized boats, fishermen, etc.
